

Modernization of Labs

In the framework of teaching the natural Sciences, 'Laboratory' is a general name for activities based on observations ,tests and experiments done by the students. It is hard to imagine learning to do science or learning about science without doing labs/experiments.

"The test of all knowledge is experiment .Experiment is the sole judge of scientific truth ." R. Feynman. Modernization of labs make the teaching-learning process easy and interesting. The students explore some of the consequences of Physics concepts and principles developed in the concurrent lecture courses.They learn easily by doing experiments . This exploration by the students leads to a much deepened knowledge and understanding of the laws of Physics.
